NGO Management System

User Manual

Web address: https://ngo-system-e5af.onrender.com

For: everyone who uses the system: administrators, program, M&E, finance and data staff

Works in: Chrome, Edge or Firefox, on a computer or tablet

Version 1.0 · October 2026

This manual explains every part of the system, one chapter per menu item. Each chapter covers what the module is for, who can use it, how to work with it step by step, and the rules the system checks. For a short introduction, see the separate **Quick Start Guide**.

F. Glossary

PART A

Getting started

Signing in, finding your way around, and the order of work.

1. About the system

The NGO Management System keeps all of an organization's program work in one place: the people it serves, its programs and projects, activities and trainings, the goods and services it delivers, its donors and donations, its budgets and spending, and the reports that bring all of this together.

What you can do with it

- **Register beneficiaries** (one at a time or from Excel), enroll them in programs, and group them in enterprises.
- **Plan the work:** programs, projects (also in phases), terms of reference, activities and activity runs.
- **Record the work:** attendance at trainings, and the goods, cash and services delivered to people, households, groups and institutions.
- **Manage money:** donors, donations in several currencies, approved budgets, and expenses with approval.
- **Report:** a dashboard and ready-made reports for any period, with Excel, PDF and CSV export.

Your organization's data is private

Many organizations use the same system, but each one sees only its own records. Within your organization, each user sees and does only what their role allows (see chapter 2).

Words in this manual

Menu paths are written like Beneficiaries › Enrollments: open the **Beneficiaries** group in the left menu, then click **Enrollments**. Buttons are written in **bold**. Your administrator may have renamed some terms (for example "Fund" instead of "Donation"), so your screens can use different words from this manual (see chapter 24).

2. Signing in and passwords

Signing in

1. Open **https://ngo-system-e5af.onrender.com**.
2. Enter your **Email** and **Password** and click **Sign in**. The eye icon shows the password as you type.
3. The Dashboard opens.
4. To leave, open the menu under your name at the top right and choose **Logout**. Always log out on a shared computer.

> **First visit of the day:** the site may need up to one minute to start. After that it is fast.

Passwords

- A password needs **at least 8 characters**, with **letters and numbers**, and must not be your email address.
- After **5 wrong passwords** the account is locked for **15 minutes**. It unlocks by itself, or an administrator can reset the password.
- **Forgot your password?** Ask your organization administrator. They give you a temporary password, and the system asks you to choose your own password the next time you sign in.

User types (roles)

Role	What it can do
Organization Admin	Everything in the organization: settings, users, roles, wording, lookups, custom fields, all records, all approvals.
Finance Officer	Budgets and expenses, including approving them; donors and donations.
Data Entry	Daily records: beneficiaries, enrollments, enterprises, projects, terms of reference (writing and submitting), activity runs, attendance, service deliveries, donations, expenses (submitted for approval).
Viewer	Can see everything and run reports, but cannot change anything.

Your administrator can also create **custom roles** such as "Program Manager" or "M&E Officer" with exactly the rights your organization needs (chapter 23). The menu shows only what your role may use.

3. Finding your way around

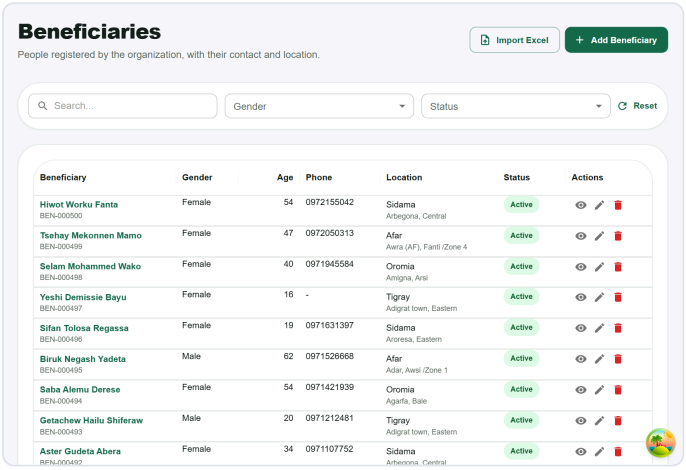

The screen

- **Left menu:** the modules, in groups (Main, Beneficiaries, Services, Programs, Activities, Funding, Finance, Administration). Click a group title to fold or unfold it.
- **Top bar:** the bell shows notifications (for example "a budget is waiting for your approval"). Your name and role are at the top right.

Lists

Each module opens with a list of its records.

- **Search** finds records by name, code or other text. **Filters** (status, program, year ...) narrow the list. **Reset** clears them.
- Click a **name** (green) to open the record. The icons on the right are **view**, **edit** and **delete**.
- The button at the top right adds a new record (for example **Add Beneficiary**, **Create Activity**, **New Budget**).

A list: search and filters on top, records below, actions on the right.

Forms

- Fields marked ***** are required.
- Lists that depend on each other open in order: choose the **Program** first, then its **Project**; choose the **Region**, then its **Zone**, then its **Woreda**.
- If something is wrong, a message at the top says **"Please check: ..."** and names the field and the problem.

Detail pages

A detail page shows everything about one record and the records linked to it (for example a project's phases, activities and budget). Use **Edit** to change it and **Back** to return to the list.

Codes and history

- The system gives every record a code automatically, for example **BEN-000123** for a beneficiary or **PRG-000002-PRJ-003-ACT-001-RUN-002** for an activity run (the code shows where the run belongs). Use codes when you talk about a record.
- Every change is saved immediately and recorded in the history, which shows who did what and when.
- A record that others depend on cannot be deleted. For example, a project with activities cannot be deleted. The message tells you why.

4. How the work flows

Work in this order. Each step uses what the earlier steps created, so the right choices appear in the forms.

1 · Set up
Organization, users, roles, lookups, custom fields

2 · Plan
Programs, projects, budgets, TORs, activities, runs

3 · Fund
Donors and donations

4 · Do the work
Beneficiaries, enrollments, attendance, service delivery, expenses

5 · Report
Dashboard and reports

How records connect

Record	Belongs to	Example
Program	The organization	Women and Youth Livelihoods
Project	A program	Small Business Start-up Grants
Phase	A project (a phase works like a project of its own)	Community Water Points, Phase 2
Activity	A project	Business skills training
Activity run	An activity (one batch, place and dates)	Batch 2, Adigrat town
Attendance session	An activity run	Training session 1
Enrollment	A beneficiary and a program	Hiwot enrolled in Livelihoods
Service delivery	A program, and optionally a project, activity or run	Hygiene kits to 40 people
Donation	A donor; funds a program or project	USD 60,000 grant
Budget	A program or a project (or phase)	Phase 2 Budget, FY 2027
Expense	A line of an approved project budget	Venue hire, Training & Workshops

Statuses of work

Programs, projects, activities and activity runs all use the same five statuses:

Status	Meaning	What it allows
Planned	Not started yet	Everything (plans can be prepared)
Active	Running	Everything
Suspended	Paused	Nothing new until it is Active again
Completed	Finished	No new plans; late records (deliveries, attendance, expenses) are still allowed
Cancelled	Stopped	Nothing new; not counted in reports

The fiscal year is the calendar year: **FY 2026** = 1 January to 31 December 2026.

PART B

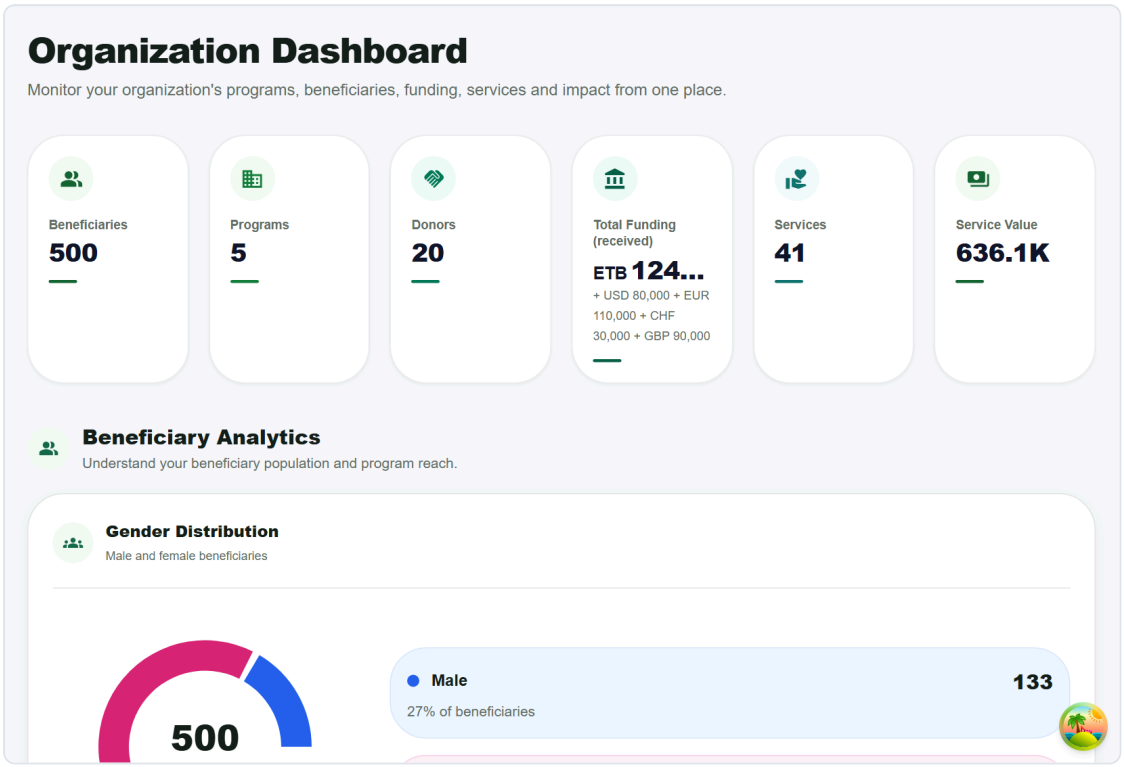

Working with the modules

One chapter per menu item, in the order of the left menu.

5. Dashboard

Everyone

The dashboard opens after you sign in. It shows your organization's key figures at a glance: beneficiaries, programs, donors, funding received (per currency), services delivered and their value, followed by charts about beneficiaries (gender, age, location), programs and services.

The organization dashboard.

> The dashboard shows the current picture. For a chosen period, filters or an export, use **Reports** (chapter 20).

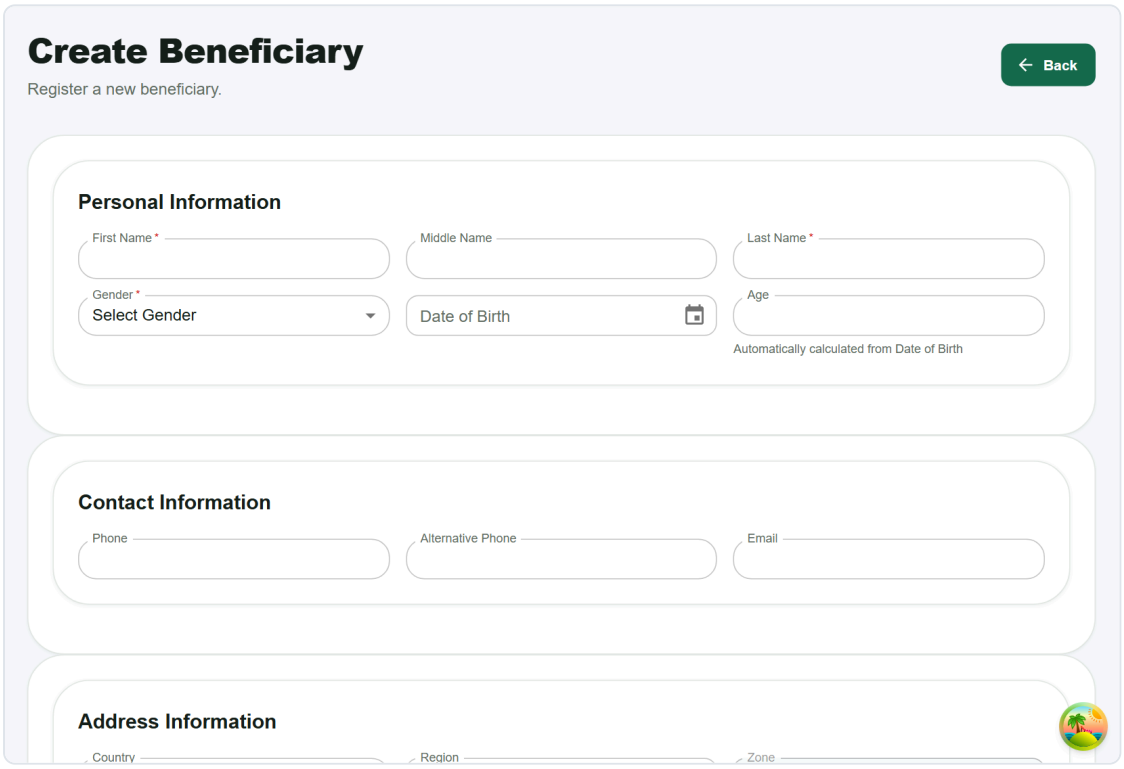

6. Beneficiaries

Admin · Data Entry (add and edit) · others view

The people your organization serves, with their personal, contact, location and vulnerability information. A beneficiary is registered once and can then be enrolled in programs, take part in activities and receive services.

Add a beneficiary

1. Go to Beneficiaries › Beneficiaries and click **Add Beneficiary**.
2. **Personal Information:** First, Middle and Last Name, Gender, Date of Birth (the age is calculated for you) and Marital Status.
3. **Contact Information:** Phone, Alternative Phone, Email.
4. **Address Information:** Country, then **Region › Zone › Woreda** (each list opens after the previous one is chosen), Kebele and Address.
5. **Socio Economic** and **Vulnerability Information:** Education Level, Occupation, Person With Disability, Disability Type and Vulnerable Groups.
6. **Custom Fields:** any extra questions your organization added.
7. Click **Save**. The beneficiary gets a number such as **BEN-000501**.

The beneficiary form.

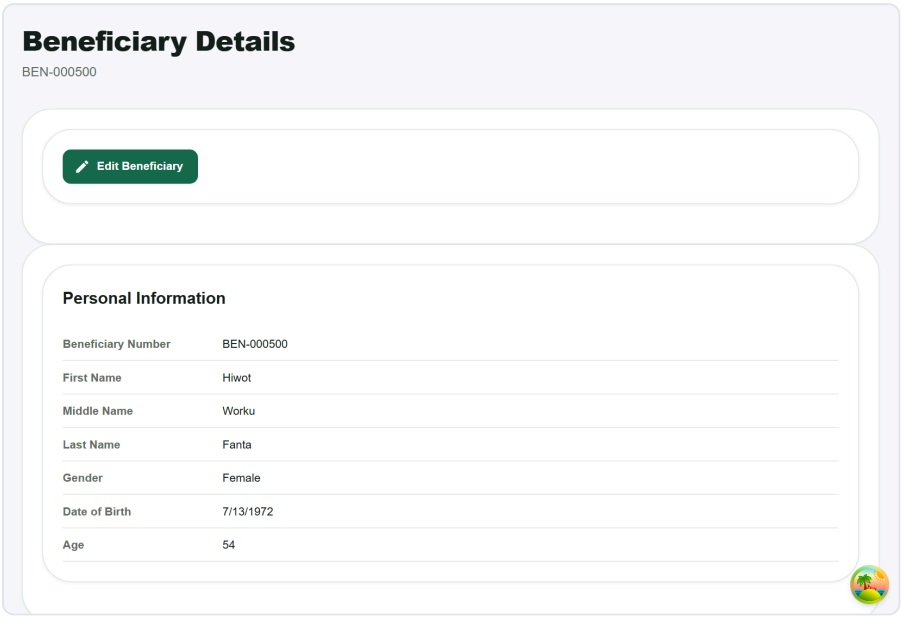

Import many beneficiaries from Excel

1. On the beneficiary list click **Import Excel**, then **Download Template**.
2. Fill in one row per person. Use the official region, zone and woreda names. Do not type the age: it is calculated from the date of birth.

3. Upload the file (.xlsx, at most 10 MB). The system imports the correct rows and lists the rows with problems so you can fix and upload them again.

The beneficiary page

Open a beneficiary to see all their information: personal, contact, address, socio-economic, vulnerability, custom fields and documents. Use **Edit Beneficiary** to change details. To see the programs, trainings and services a person received, use the **Beneficiaries** report (chapter 20).

A beneficiary's page.

Status

- **Active:** normal.
- **Inactive:** the person has left (moved, passed away, no longer served). Their history stays, but they cannot be enrolled, receive services or be added to anything new.

7. Enrollments

Admin · Data Entry

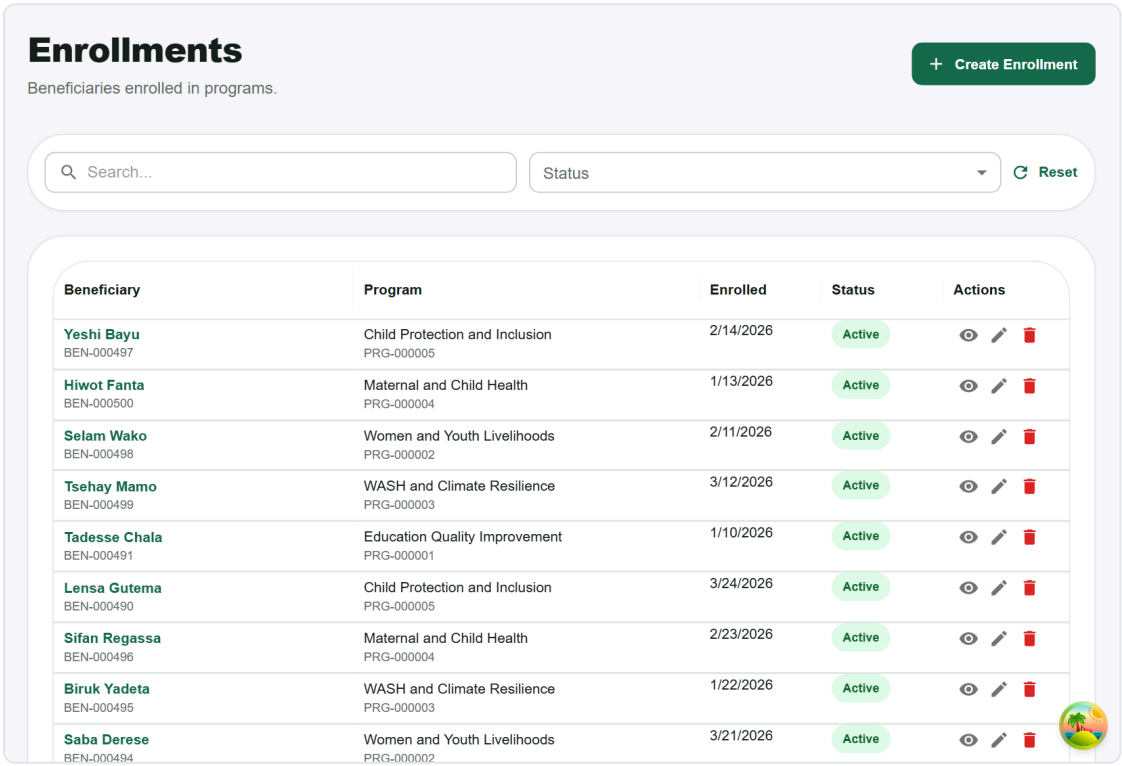

An enrollment records that a beneficiary is part of a program, from a date, with a status. Reports use enrollments to count the people enrolled in each program.

Enroll a beneficiary

1. Go to Beneficiaries › Enrollments and click **Create Enrollment**.
2. Choose the **Beneficiary** and the **Program**, and enter the **Enrollment Date** (inside the program's dates).
3. Set the **Status** and add **Remarks** if needed, then save.

Status	Use when
Pending	Selected but not started yet
Active	Taking part
Suspended	Paused for a while
Completed	Finished the program: enter the **Completion Date**
Dropped	Left before finishing: enter the **Exit Reason**

> A person can be enrolled in a program only once, and only while the program is not Completed, Suspended or Cancelled.

The enrollment list.

8. Enterprises and members

Admin · Data Entry

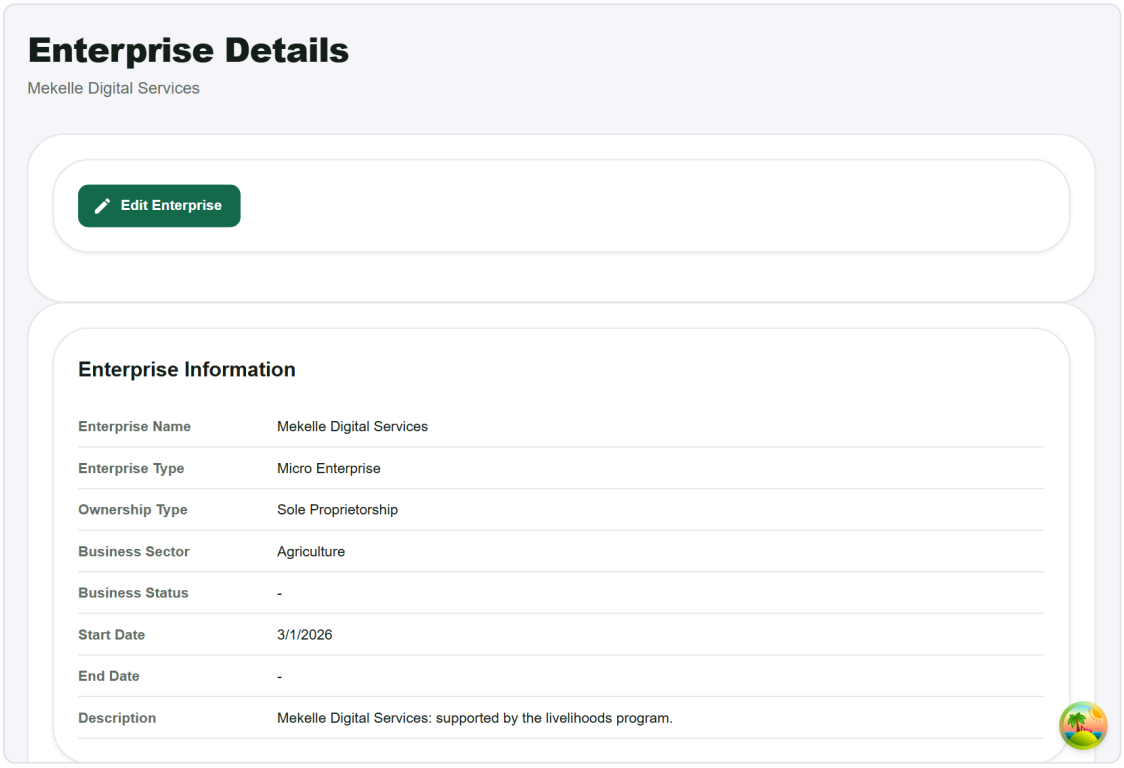

Enterprises are businesses, cooperatives and groups run by beneficiaries, for example a dairy cooperative or a women's savings group. Their members are beneficiaries.

Add an enterprise

1. Go to Beneficiaries › Enterprises and click **Add Enterprise**.
2. Enter the **Enterprise Name**, **Enterprise Type**, **Ownership Type**, **Business Sector**, **Business Status**, **Registration Number**, **Capital**, **Start Date**, contact and location, then save.

Add members

1. Open the enterprise and use **Add Enterprise Member** in its Members table (or Enterprise Members in the menu).
2. Choose the **Beneficiary**, the **Member Role** (Member, Partner, Shareholder, Manager, Employee) and the **Joined Date**.
3. When a member leaves, edit the membership and enter the **Left Date**.

An enterprise with its members table.

> An enterprise is **Active** or **Inactive**. No new members can be added to an inactive enterprise or from inactive beneficiaries.

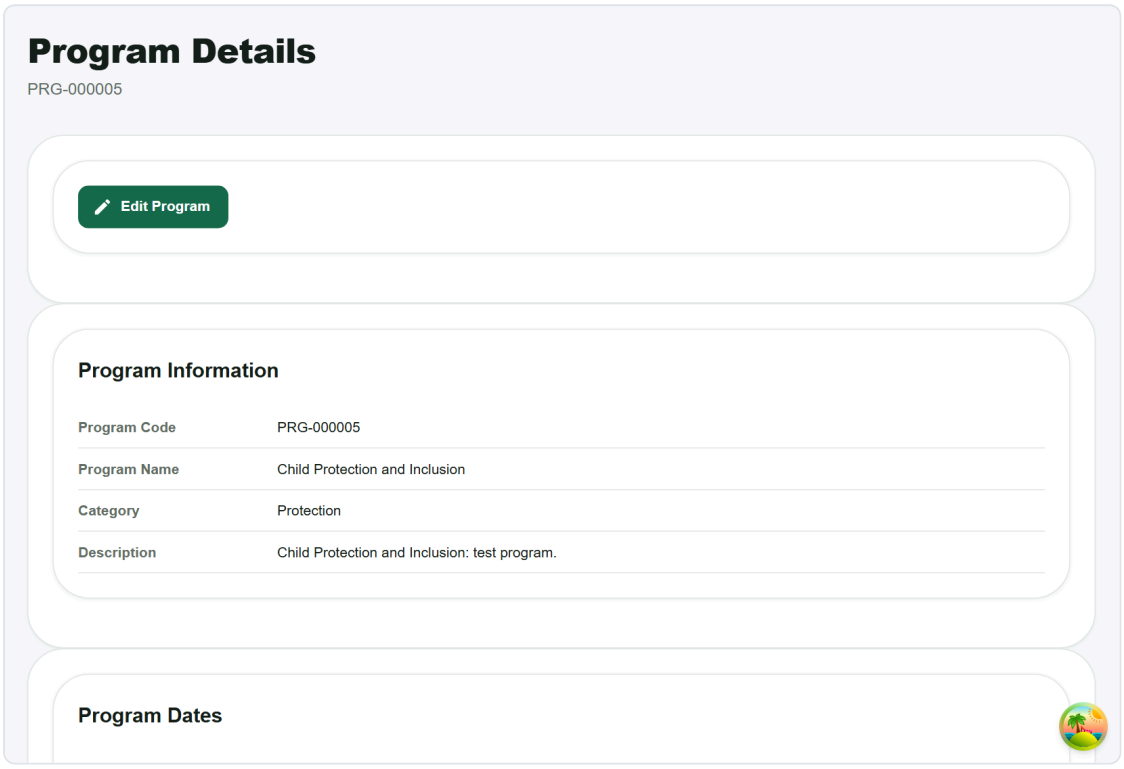

9. Programs

Admin (others view)

A program is a large area of work, such as "WASH and Climate Resilience" or "Child Protection and Inclusion". Projects, enrollments, service deliveries, donations and budgets all belong to a program.

1. Go to Programs › Programs and click **Add Program**.
2. Enter the **Program Name**, **Category**, **Description** and **Target Beneficiaries**.
3. Set the **Start Date** and **End Date**, and the **Status** (see chapter 4). Save.

The program page shows its projects, budget and spending, and the people it reached.

A program's page.

> A program's dates cannot be shortened so that its projects or enrollments fall outside them.

10. Projects and phases

Admin · Data Entry

A project is a piece of work inside a program, usually with its own donor, manager, dates and budget.

Add a project

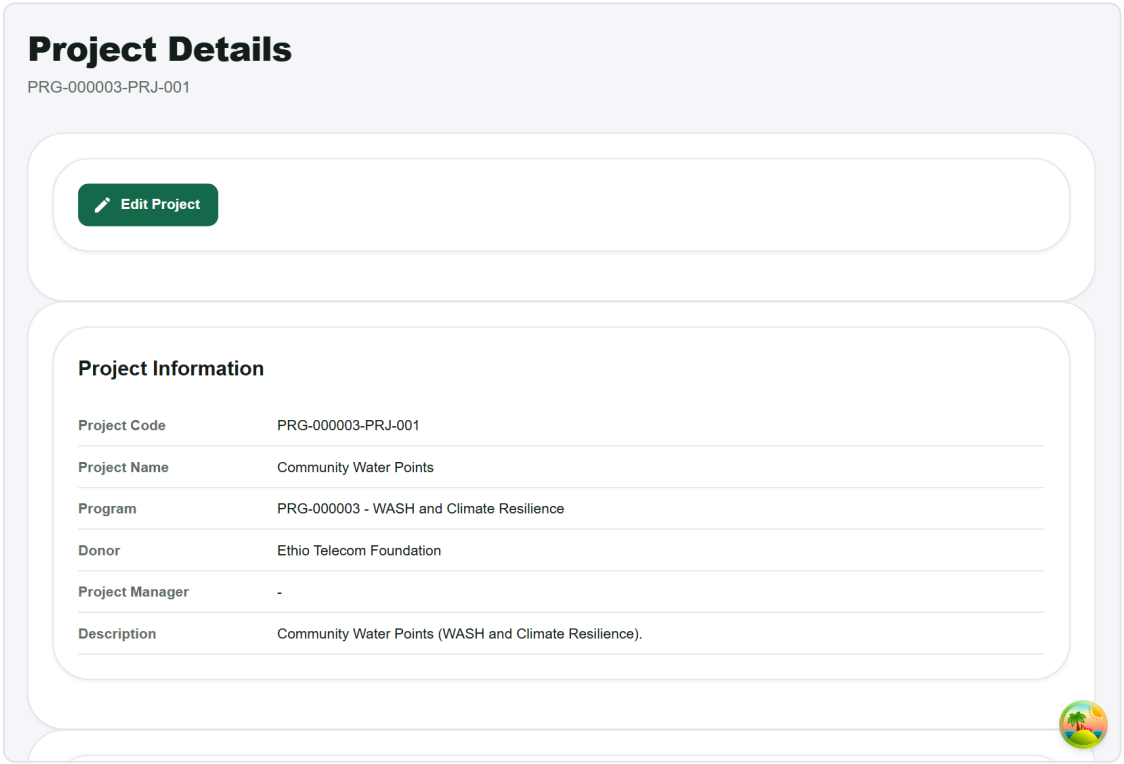

1. Go to Programs › Projects and click **Add Project**.
2. Choose the **Program** and enter the **Project Name** and **Description**. Choose the **Donor** and the **Project Manager**.
3. Enter the **Start Date** and **End Date** (inside the program's dates) and the **Status**. Save.

The project's money is not entered on this form. It is planned in **Finance › Budgets** (chapter 18) and then shows on the project page.

Projects in phases

When a project runs in phases (Phase 1 in 2026, Phase 2 in 2027 …), each phase is created as its own project linked to the main project:

1. Open the main project.
2. In the **Phases** card click **Add Phase**. Give it a name and dates inside the main project's dates.
3. Each phase then has its own activities, budget, deliveries and reports, just like a single project. The main project's page and reports add up all its phases.

A project's page: information, phases, budget and activities.

11. Terms of Reference (TOR)

Data Entry writes · Admin approves

A TOR describes a planned activity or training before it happens: why, what, who, where, how and at what cost. After approval, the activity can be created directly from it.

Write and submit a TOR

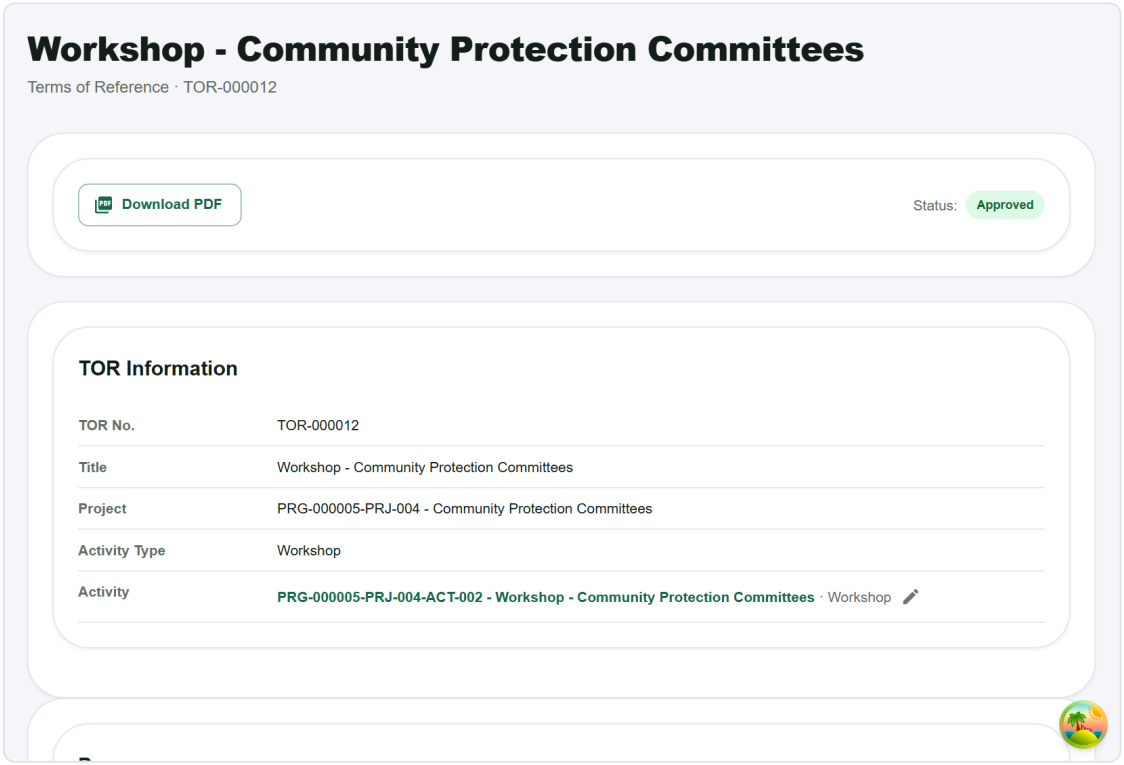

1. Go to Activities › Terms of Reference and click **New TOR**.
2. **TOR Information:** Title, Project, Activity Type, and an existing Activity or Activity Run if it is for one (usually left empty).
3. **Purpose:** Background, Objectives and Expected Outputs (all three are required before submitting).
4. **Participants and Facilitators:** who will attend, the expected number, and facilitators or resource persons.
5. **Date and Venue:** start and end dates, region, woreda and venue.
6. **Methodology**, **Logistics and Reporting**, and the **Budget** lines (description, amount, currency).
7. Save, then click **Submit for Approval**.

Approve

The approver opens the TOR and clicks **Approve**, or **Return** it with a comment. A returned TOR can be corrected and submitted again. The **Approval History** shows who submitted and approved it and when. Use **Download PDF** to print or share it.

Create the activity from the TOR

On an approved TOR, click **Create Activity from TOR**. The activity is filled in from the TOR (name, type, project, dates, place).

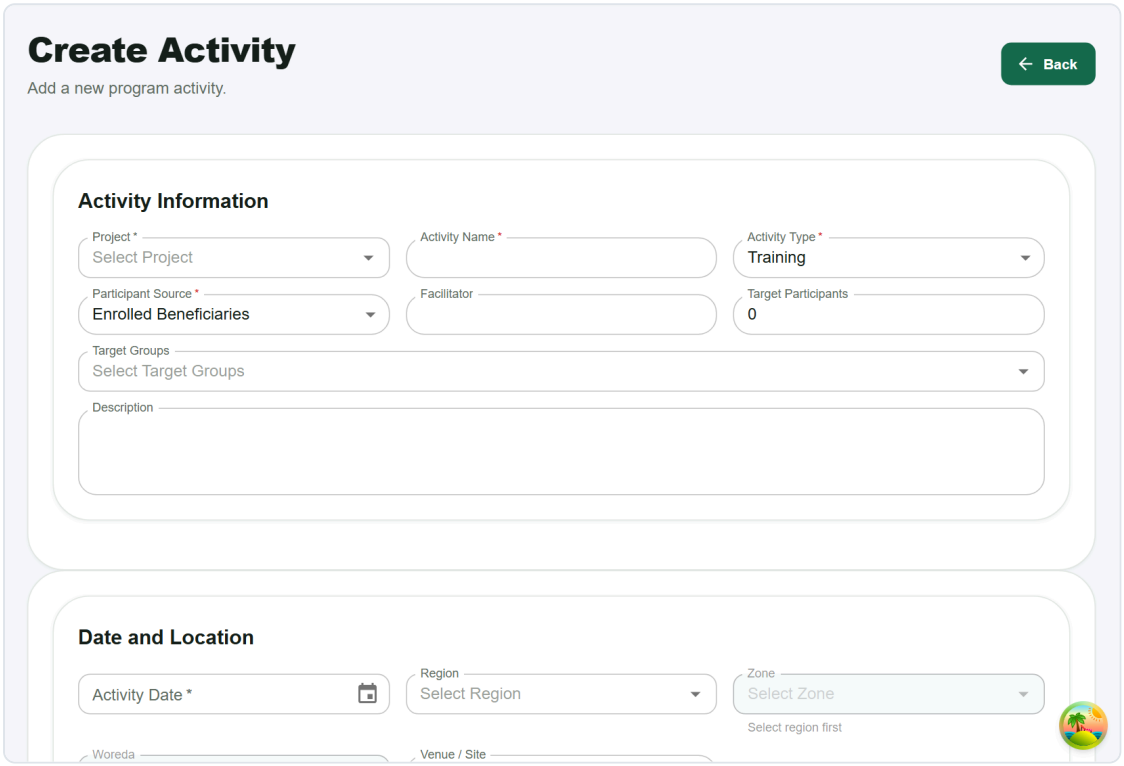

An approved TOR with its activity.

12. Activities

Admin (Data Entry through an approved TOR)

An activity is something a project does: a training, workshop, meeting, campaign, field visit, assessment, distribution and so on. An activity can run several times (see Activity runs).

1. Go to Activities › Activities and click **Create Activity** (or create it from an approved TOR).
2. **Activity Information:** Project, Activity Name, Activity Type, Participant Source (enrolled beneficiaries, staff, partners, mixed …), Target Participants, Target Groups, Facilitator and the Terms of Reference.
3. **Date and Location:** Activity Date (inside the project's dates), Region, Woreda and Venue / Site.
4. Add a **Description** or **Remarks**, set the **Status** and save.

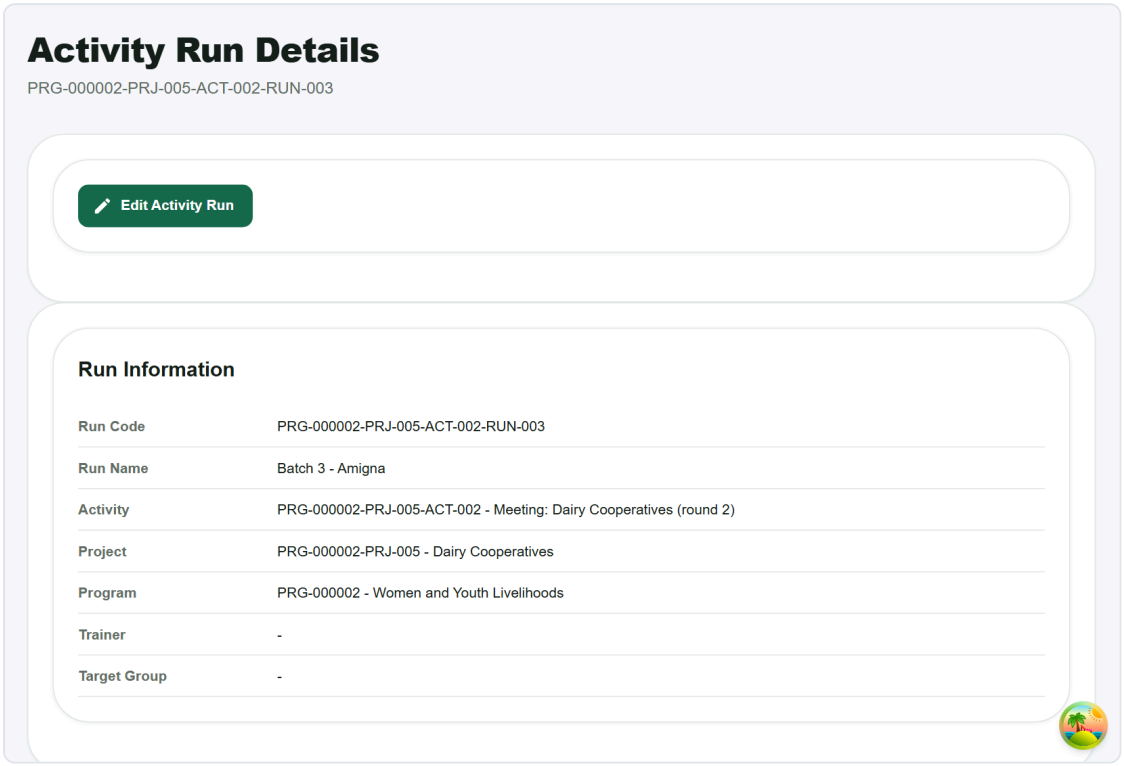

The activity form. The dates allowed by the project are shown under the date.

13. Activity runs

Admin · Data Entry

An activity run is one implementation of an activity: one batch, in one place, on certain dates. For example, "Business skills training" may have Batch 1 in Adama and Batch 2 in Adigrat. Attendance is recorded per run.

1. Go to Activities › Activity Runs and click **Create Activity Run**.
2. Choose the **Activity**. Enter the **Run Name**, **Trainer** and **Target Group**.
3. **Schedule and Location:** Start Date and End Date (inside the project's dates), Region, Woreda and Venue / Site.
4. Add **Notes**, set the **Status** and save. The run gets a code such as **...-ACT-001-RUN-002**.

An activity run's page, with its sessions and attendance.

14. Attendance

Admin · Data Entry

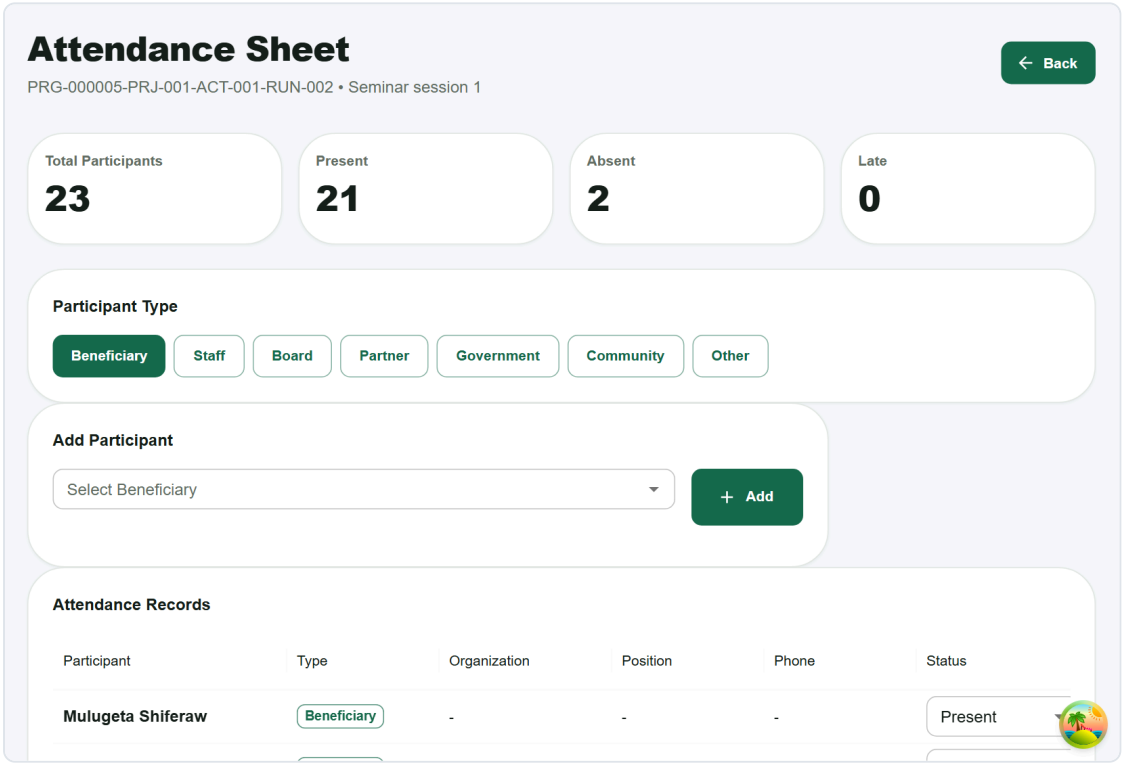

Attendance records who took part in each session of an activity run. It feeds the reports on people trained, completion and attendance rate.

Create a session

1. Go to Activities › Attendance and click **Create Attendance**.
2. Choose the **Activity Run**, enter the **Session Number**, **Session Title** and **Session Date** (inside the run's dates), and save.

Fill in the attendance sheet

1. Open the session's **sheet** (the sheet icon in the list).
2. With **Beneficiary** selected as the Participant Type, pick a person in **Select Beneficiary** and click **Add**. Repeat for each person.
3. To add others, choose their **Participant Type** (Staff, Board, Partner, Government, Community, Other), enter their name, gender, age group, organization, position and phone, and click **Add**.
4. In **Attendance Records**, set each person's status: **Present**, **Late**, **Excused** or **Absent**, then save. The totals at the top (participants, present, absent, late) update.

An attendance sheet with totals and participant types.

Two people editing the same sheet: if someone else saved the sheet after you opened it, your save is refused so that their work is not overwritten. Reload the sheet and enter your changes again.

15. Service delivery

Admin · Data Entry

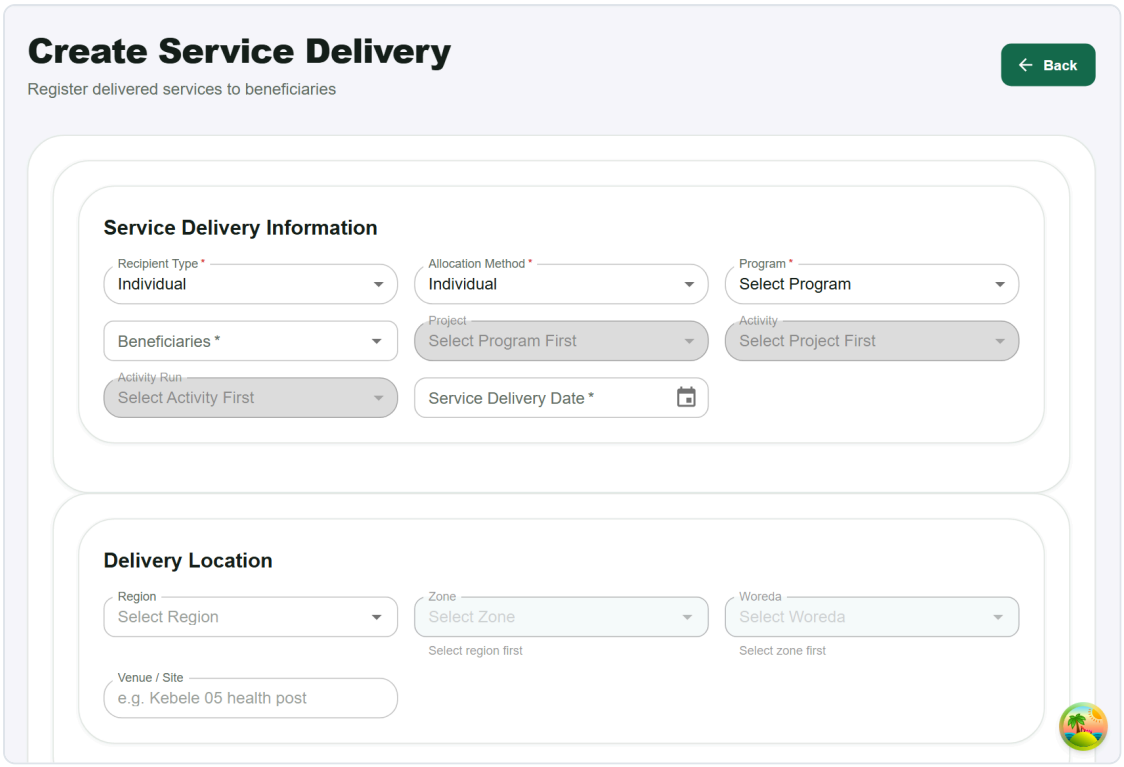

A service delivery records goods, cash or services given out: what, how much, to whom, where, when, and which donation paid for it. Reports use it to count the people reached and the value delivered.

Who receives it

Recipient Type	Allocation	Example
Individual	**Individual:** each person's own quantity is entered. **Shared:** the total is shared equally by the people chosen.	Hygiene kits to 20 women; a training shared by its participants
Household	To the household as a whole	Food package per household
Group / Community	To the group as a whole	Water point for a community
Institution	To the institution as a whole	Furniture for a school or health post

Record a delivery

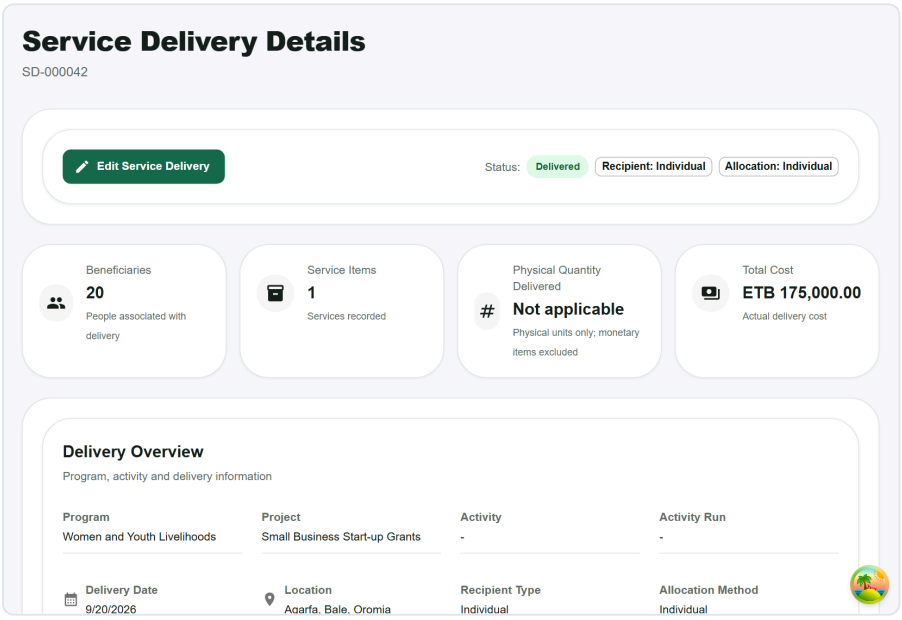

1. Go to Services › Service Delivery and click **Create Service Delivery**.
2. Choose the **Recipient Type** and **Allocation Method**, then the **Program** and, if it belongs to them, the **Project**, **Activity** and **Activity Run**.
3. Choose the **Beneficiaries** (or the household, group or institution) and the **Service Delivery Date**.
4. **Delivery Location:** Region › Zone › Woreda and Venue / Site.
5. **Service Items:** for each item, the Service Category, Service Type, item, Unit, Quantity, Unit Cost and Currency. Add details (for example what a kit contains) if needed.
6. **Funding:** choose the **Donation** that paid for each item. If the item was bought with an expense, choose it in **Bought with expense** so that the cost is not counted twice.
7. Check the allocation per person and save.

The service delivery form.

The delivery page

Shows the overview (people reached, value), the items, how they were allocated to each person, and the donations and expenses that paid for them.

A delivery's page.

> Only services allowed for the chosen recipient type are offered (set by the administrator in Lookups). Inactive beneficiaries and suspended or cancelled programs, projects and activities cannot receive new deliveries. A delivery that did not happen should be set to **Cancelled**; it is then left out of the reports.

16. Donors

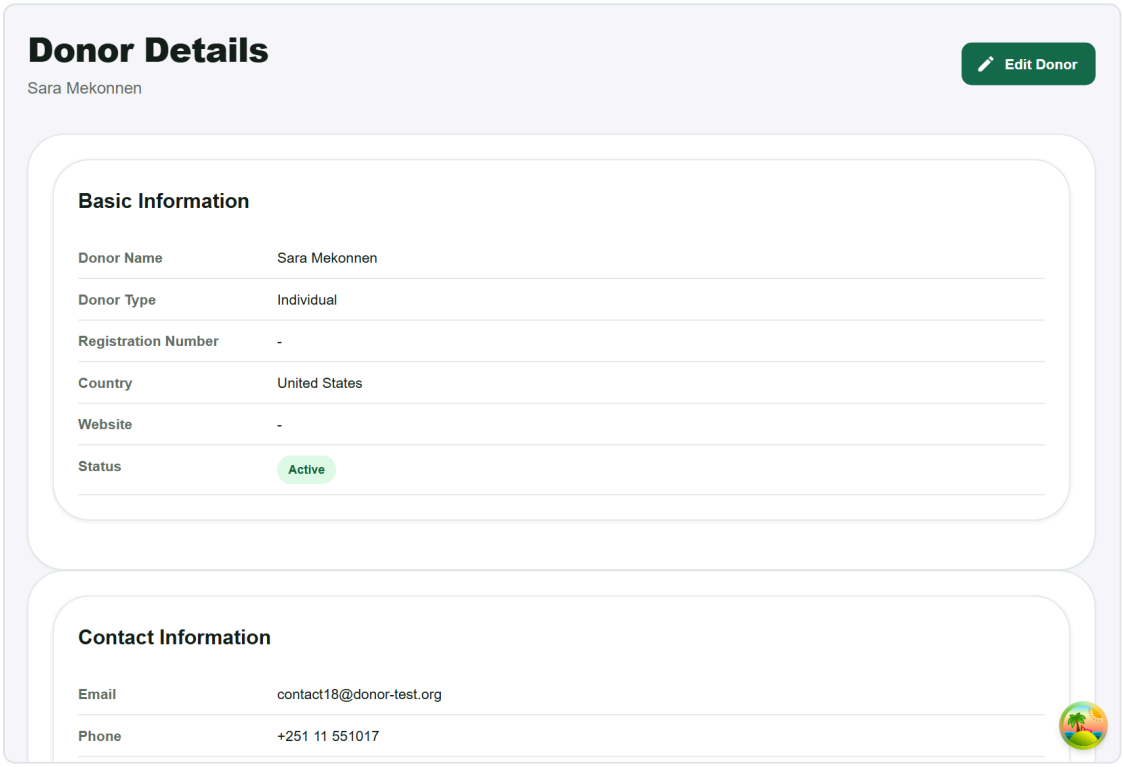

Admin · Finance Officer

Donors and funding partners: governments, foundations, NGOs, companies and individuals.

1. Go to Funding › Donors and click **Add Donor**.
2. **Basic Information:** Donor Name, Donor Type (Individual, Organization, Government, NGO, Corporate, Foundation), Registration Number, Status.
3. **Contact Information:** Contact Person, Phone, Email, Website, Country, Address.
4. **Donor Dates:** Donor Since, Last Contact Date, Next Follow-up Date, and Notes.
5. **Reporting and Privacy:** tick **Share beneficiary names with this donor** only if the donor may see names. Otherwise they see numbers only.

Share results with a donor (share link)

On the donor's page you can create a **private link** that lets the donor see where their donations went (people reached, places, services), without an account. Choose all donations or one, and how long the link is valid (90 days recommended). You can **revoke** a link at any time, and the page shows when it was last viewed.

A donor's page.

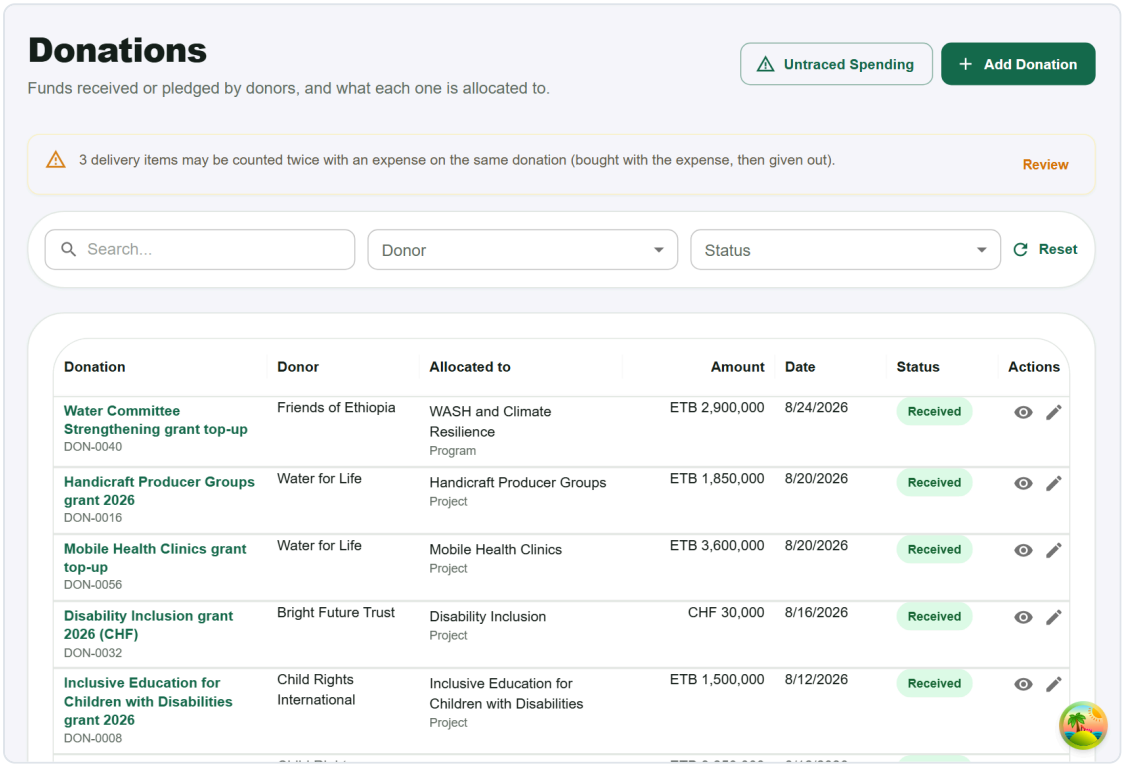

17. Donations

Admin · Finance Officer · Data Entry (add)

Money and in-kind support received or promised by donors, and what each donation is allocated to.

Record a donation

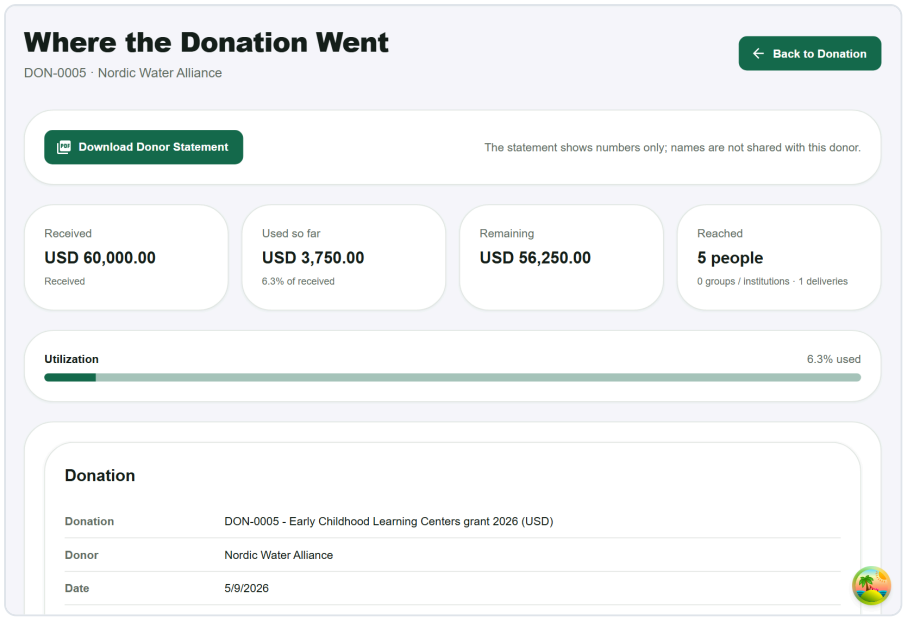

1. Go to Funding › Donations and click **Add Donation**.
2. Choose the **Donor** and enter the **Donation Title**, **Donation Type** (Cash, Bank Transfer, Material, Equipment, Service, Other), **Funding Source** and **Funding Restriction** (Restricted or Unrestricted).
3. Enter the **Amount**, **Currency** and **Donation Date**. For a currency other than ETB, also enter the **Exchange rate when received**.
4. Choose the **Program** and, if any, the **Project** it funds, and enter the **Receipt Number** and **Reference Number**.
5. Set the **Status**: **Pledged** (promised), **Received**, or **Cancelled**. Save.

The donation list, with a warning about possible double counting.

Where the donation went

Open a donation and click **Where Did It Go?** to see what it paid for: expenses, items given out, places and people reached, and how much is left. For a foreign currency it also shows the value in ETB (received, used, exchange gain or loss). **Download Donor Statement** gives a PDF for the donor.

"Where the donation went": received, used, remaining, people reached.

Possible double counting: when items were given out and an expense on the same donation has about the same amount but they are not linked, the list shows a warning. Open it and link the items to the expense, or confirm they are different. **Untraced spending** lists deliveries that are not linked to any donation.

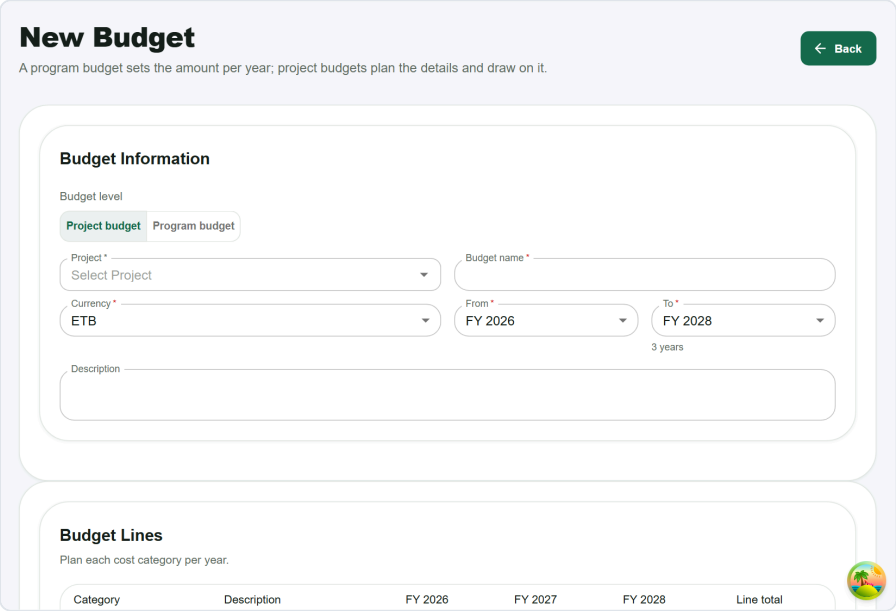

18. Budgets

Admin · Finance Officer

Budgets plan the money per year and per cost category. A **program budget** sets the total per year; **project budgets** plan the details and draw on their program's budget. Expenses are charged to the lines of approved project budgets.

Create a budget

1. Go to Finance › Budgets and click **New Budget**.
2. Choose **Project budget** or **Program budget**, then the project or program, the **Budget name**, the **Currency** and the **Period** (From FY … To FY …; one or several years).
3. **Budget Lines:** for each line, the **Category** (Personnel, Training & Workshops, Travel & Per Diem, Direct Beneficiary Support, Supplies & Materials, Equipment, Consultancy & Services, Administration & Overhead, Other), a description and the amount for each year.
4. Totals shown in red go over what is left in the program budget. Save.
5. Click **Submit for Approval**. The budget is locked while it is reviewed, and the approvers are notified.

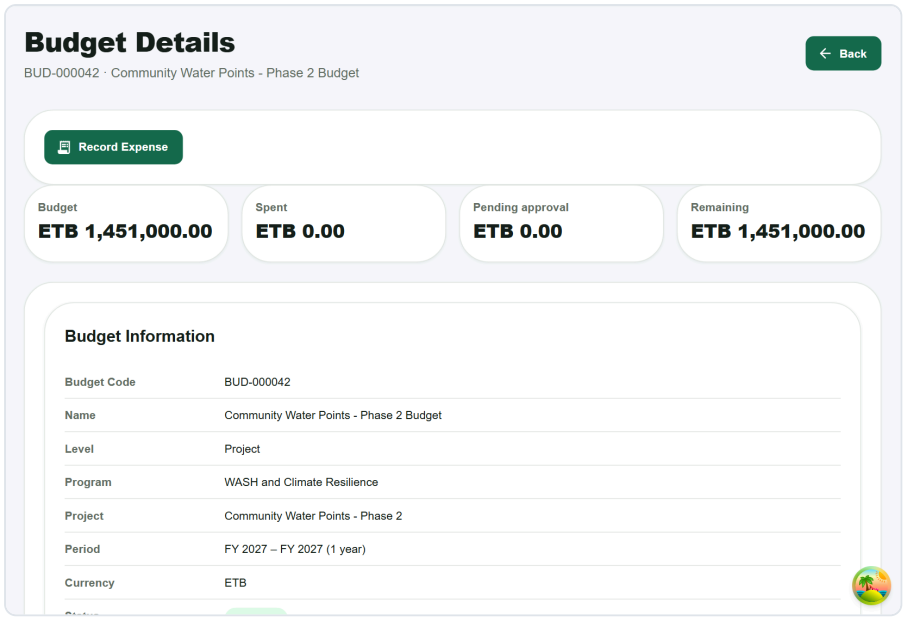

A new budget with its lines per year.

Approve or return

A finance officer or admin opens the budget and clicks **Approve**, or **Return** it with a comment. A returned budget can be corrected and submitted again.

Change an approved budget (revision)

1. Open the approved budget and start a **revision**.
2. Change the figures and give the **Reason for this revision** (what changed and why).
3. Click **Submit Revision**. Once approved, the old figures are kept as a version in the **History**, and expenses stay attached. **Cancel Revision** discards the proposal.

A budget: budget, spent, pending and remaining.

Spent = approved expenses. **Pending** = expenses recorded but not yet approved (not deducted yet). For a project in phases, each phase has its own budget.

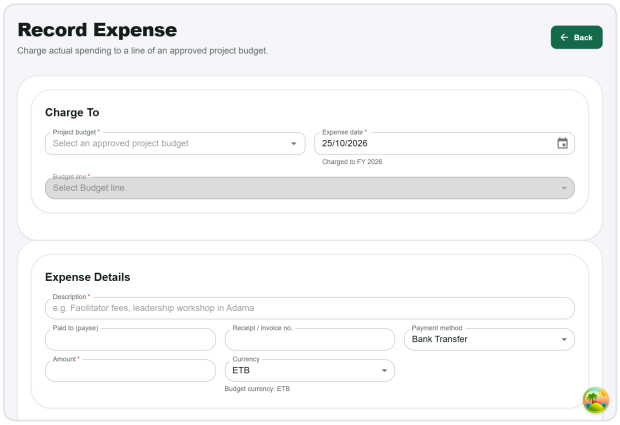

19. Expenses

Data Entry / Finance record · Finance Officer / Admin approve

Actual spending, charged to a line of an approved project budget and, if known, paid from a donation.

Record an expense

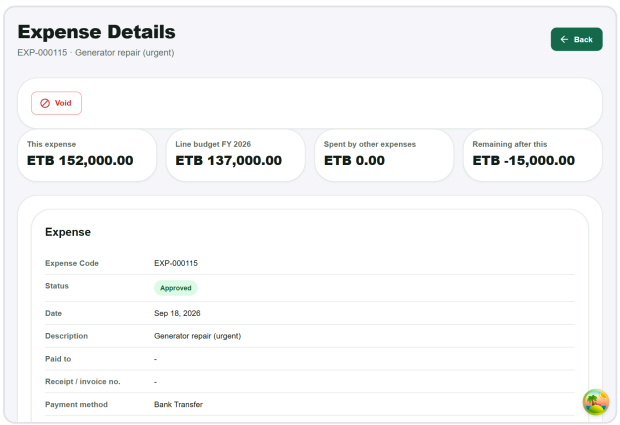

1. Go to Finance › Expenses and click **Record Expense**.
2. **Charge To:** choose the approved **Project budget**, the **Expense date** (its fiscal year is shown) and the **Budget line**.
3. **Expense Details:** Description, **Paid to (payee)**, **Amount**, **Currency**, **Payment method** (Cash, Bank Transfer, Cheque, Mobile Money, Other) and **Receipt / invoice no.**
4. **Links (optional):** the Activity it was for, and the donation it was **Paid from**.
5. Save, then **Submit for Approval**.

Recording an expense.

Approve, return or void

- **Approve Expense:** it now counts as spent on the budget line and is locked.
- **Return for Changes:** it goes back to the person who recorded it.
- **Over budget:** if the line would go over budget, the form warns you. It can still be submitted, but the approver must click **Approve over budget** and give a reason.
- **Void Expense:** cancels an approved expense that was wrong (with a reason). It then no longer counts as spent but stays in the history.

An expense with its effect on the budget line.

20. Reports

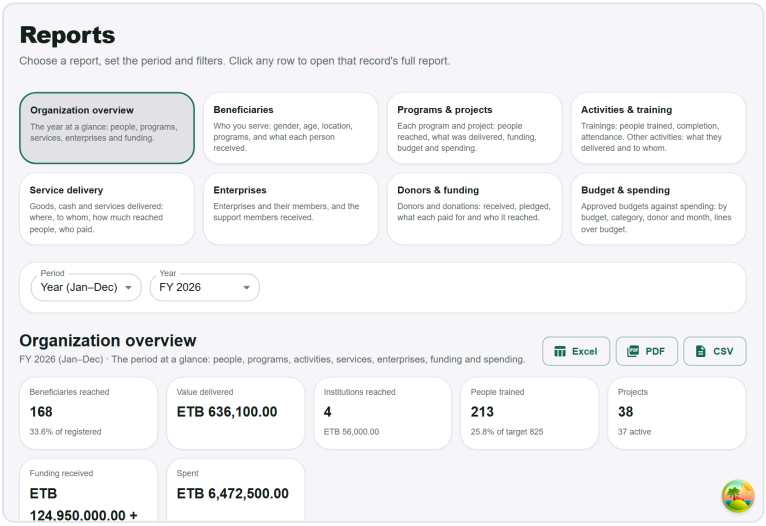

Everyone (money figures only for roles that may see finance)

Ready-made reports for any period, with filters, charts, and Excel, PDF or CSV export.

Report	Shows
Organization overview	The period at a glance: people, programs, activities, services, enterprises, funding and spending
Beneficiaries	Who you serve: gender, age, location, programs, and what each person received
Programs & projects	Each program and project: people reached, what was delivered, funding, budget and spending
Activities & training	Trainings (people trained, completion, attendance) and other activities (what they delivered and to whom)
Service delivery	Goods, cash and services delivered: where, to whom, people reached, who paid
Enterprises	Enterprises, their members, and the support members received
Donors & funding	Donors and donations: received, pledged, what each paid for and who it reached
Budget & spending	Approved budgets against spending: by budget, category, donor and month; lines over budget

Run a report

1. Go to Reports and click a report card.
2. Choose the **Period**: year (Jan–Dec), half year, quarter, month, date range, or all time.
3. Add filters if offered: program, project, region, gender, status.
4. Click any row to open that record's full report (for example one project).
5. Download with **Excel**, **PDF** or **CSV**.

The report center with the organization overview.

> The report address in the browser keeps the period and filters, so you can bookmark a report or send its link to a colleague who has access.

PART C

Administration

For organization administrators. These pages are under **Administration** in the menu.

21. Organization settings

Organization Admin

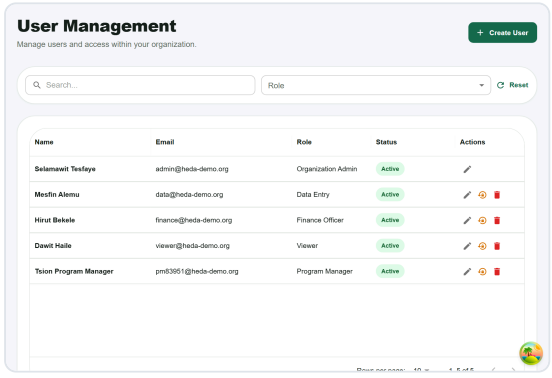

Administration › Organization holds your organization's details: Basic Information (name, type, description, founded year), Legal Information (legal name, registration and tax numbers), Contact Information, Primary Contact Person, Address, and **Branding** (logo). Keep them up to date: they appear on reports and statements.

22. Users

Organization Admin

1. Go to Administration › User Management and click **Create User**.
2. Enter the **Full Name**, **Email** and **Role**, and a password that follows the rules in chapter 2.
3. Then use **Reset password** on the new user. The system makes a temporary password, and the user must choose their own at first sign-in, so only they know it.
4. Give the person their email and the temporary password.

- **Reset a password:** the system creates a temporary password (use **Copy** to copy it). The user must choose a new password at their next sign-in.
- **Locked** users (too many wrong passwords) unlock after 15 minutes, or when you reset their password.
- **Deactivate User** when someone leaves: they can no longer sign in, but their work stays in the records and history.

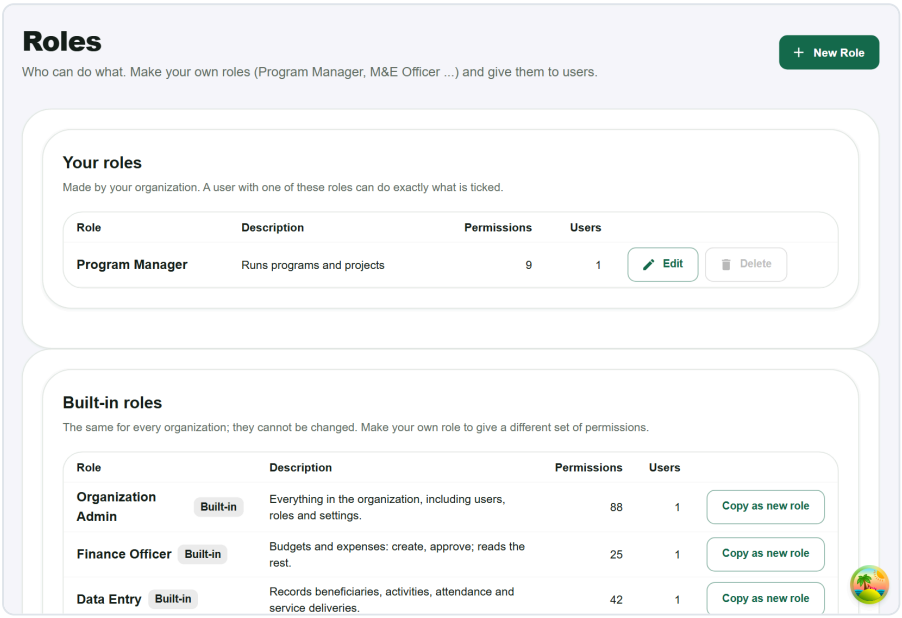

User management.

23. Roles

Organization Admin

The four built-in roles (chapter 2) cannot be changed. If your organization needs different rights, make your own roles:

1. Go to Administration › Roles and click **New Role**, or **Copy as new role** next to a built-in role to start from it.
2. Give the **Role name** (for example "Program Manager" or "M&E Officer") and a **Description**.
3. Tick the permissions per module: view, add, edit, delete, approve.
4. Save, then give the role to users in User Management.

Your roles and the built-in roles.

24. Wording

Organization Admin

Administration › Wording lets your organization use its own words. For example, "Fund" instead of "Donation", "Administrator" instead of "Organization Admin", or "Ongoing" instead of the status "Active".

1. Type your word (and its plural) next to the term. Leave the box empty to keep the default.
2. Check the **Preview**, then click **Save Wording**. Menus, pages, forms, reports and exports use the new words at once.
3. **Default** returns a term to its original word.

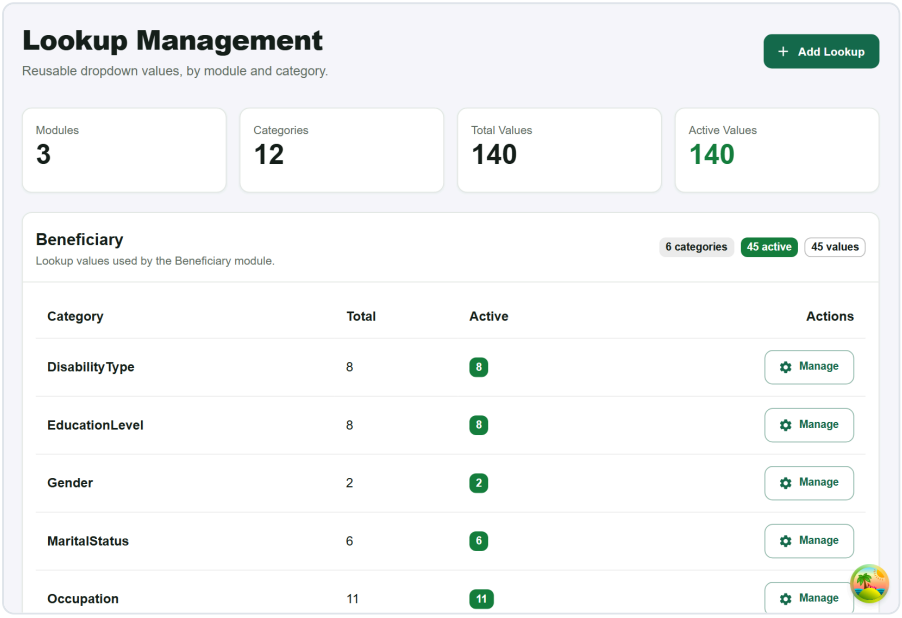

Only words are changed, never your data. Renaming a status changes only how it is shown; its meaning and rules stay the same.

25. Lookups

Organization Admin

Administration › Lookup Management holds the choices that appear in drop-down lists, by module and category: gender, education level, occupation, disability type, service categories and service types, items and units, and so on.

1. Open a module and category and click **Manage**, or click **Add Lookup**.
2. Enter the **Value** (and a **Code** if you use one). Codes must be unique.
3. For service types, also set **Can be given to** (individuals, households, groups, institutions), the **Allowed Units** and the **Allocation Behavior**.
4. A value that is no longer used can be **deactivated**. It disappears from new forms but stays on old records.

Lookup management.

26. Custom fields

Organization Admin

Administration › Custom Fields adds extra questions to the standard forms, for example "Household size" or "Mobile money user" on the beneficiary form.

1. Click **Create Custom Field**. Choose the **Module** (Beneficiary, Donor, Program, Service Delivery, User, Enterprise, Enterprise Member).
2. Enter the **Field Label** (what users see) and **Field Key** (a short internal name), and choose the **Field Type** (text, number, date, a list of choices ...).
3. Tick **Required field** if it must be filled in, and **Active field** to show it. Save.

Appendix A: Statuses

Records	Statuses
Programs, projects, activities, runs	Planned → Active → Completed, or Suspended / Cancelled (see chapter 4)
Beneficiaries, donors, enterprises, members	Active, Inactive (inactive ones receive nothing new)
Enrollments	Pending, Active, Suspended, Completed, Dropped
Budgets, TORs	Draft → Submitted → Approved, or Returned
Expenses	Draft → Submitted → Approved, or Returned; Voided
Donations	Pledged, Received, Cancelled
Service deliveries	Delivered, Cancelled
Attendance	Present, Late, Excused, Absent

Appendix B: Approvals

What	Prepared by	Approved by	After approval
Budget	Finance Officer, Admin	Finance Officer, Admin	Locked; changed only by a revision with a reason
TOR	Data Entry, Admin	Admin	The activity can be created from it
Expense	Data Entry, Finance, Admin	Finance Officer, Admin	Counts as spent; locked; can only be voided

Custom roles can be given approval rights too. Approvers get a notification (the bell) when something waits for them.

Appendix C: Rules the system checks

- **Dates:** an end date is never before its start date. Records stay inside their parent's dates: a project inside its program, an activity and its runs inside the project, a session inside its run, an enrollment inside the program, a membership inside the enterprise's dates. A parent's dates cannot be shortened past its records. Work that is already done cannot be dated in the future.
- **Status:** see chapter 4 and Appendix A.
- **Money:** expenses only go to approved project budgets. A project budget cannot exceed what is left in its program budget. Items bought with an expense are not charged to the donation a second time.
- **Duplicates:** a person is enrolled in a program only once. Lookup codes are unique.

Appendix D: Currencies

The system works in **ETB**, **USD**, **EUR**, **GBP** and **CHF**. Each amount keeps its own currency. Totals are shown per currency (for example "ETB 124,950,000 + USD 80,000"). For a donation in a foreign currency, the exchange rate on the day it was received is recorded, so reports can also show its value in ETB, the value of what was used, and the exchange gain or loss.

Appendix E: Common messages

Message	What to do
"Please check: …"	A field is missing or wrong. The message names it. Correct it and save again.
"… is Completed / Suspended / Cancelled"	The program, project or activity no longer accepts this kind of record. Change its status if the work continues.
"… is Inactive …"	The beneficiary, donor or enterprise is inactive. Make it Active if appropriate.
Date outside the project's dates	Use a date inside the dates shown, or ask an admin to extend the parent's dates.
Cannot be deleted	Other records depend on it. Delete or move those first, or set the record to Inactive or Cancelled instead.
Someone else saved the sheet	Reload the page and enter your changes again.
Account locked	Wait 15 minutes or ask your administrator to reset your password.

Appendix F: Glossary

Term	Meaning
Beneficiary	A person the organization serves
Enrollment	A beneficiary's membership in a program
Enterprise	A business, cooperative or group run by beneficiaries
Program / Project / Phase	Area of work / piece of work in a program / stage of a project
TOR	Terms of Reference: the plan of an activity, approved before it happens
Activity / Activity run	What is done / one batch of it, at one place and time
Session	One day or meeting of an activity run, with attendance
Service delivery	Goods, cash or services given out
Pledged / Received	Promised by a donor / actually received
Budget line	One cost category and its amount per year in a budget
Revision	An approved change to an approved budget, with its reason
Void	Cancel an approved expense while keeping its history
Lookup	A choice in a drop-down list, managed by the administrator
FY	Fiscal year = calendar year (January–December)
